

Bolted Silos for Cement Loadout

Columbian TecTank offers a superior product for industrial process cement loadout. Our dry bulk silos are designed for continuous through-put applications.

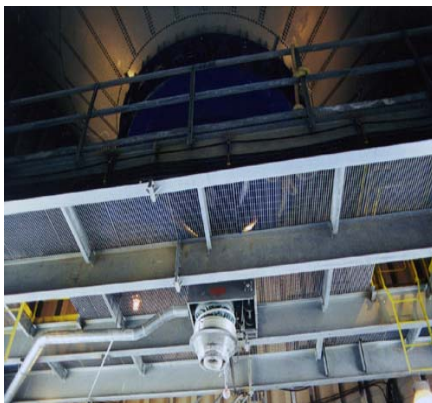

Features

Available in 21' to 47' diameters and capacities from 10,000 to 150,000 cubic feet, you can select a Columbian TecTank silo with calculations and PE stamps for your specific application. Hopper designs from 45 to 70 degrees can accommodate air slide, air pad or bin activator attachments. Our factory baked-on coating systems have high gloss and color retention while providing extended service life with low maintenance costs. Columbian TecTank will design, manufacture and erect the silo for a complete turnkey installation. Your tank can be fabricated and erected with single source responsibility within 14 weeks of the order date. All Columbian TecTank facilities are ISO 9000 Quality System Certified.

Options

Columbian TecTank silos for cement don't limit you to a standard product, either. We offer a full range of options, including deck perimeter guardrails, OSHA approved outside safety ladders, deck filter flanges, level indicator openings, combination manway pressure vacuum relief, spiral stairways, custom access platforms and conveyor supports.

There is no more cost-efficient solution for cement loadout than dry bulk bolted silos from Columbian TecTank.
