

COLUMBIAN TEC TANK'S COMPONENT IN TANK SOLUTIONS

The Exceptional Value of Experience

Your Equipment Installed to Your Specifications

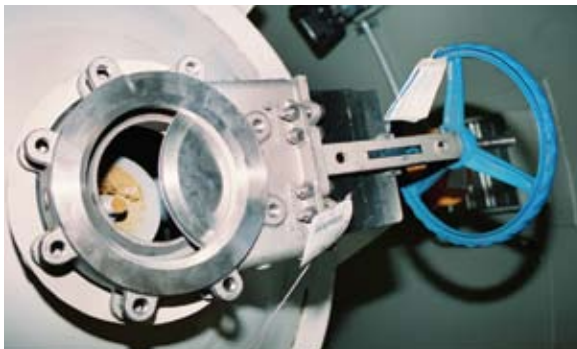

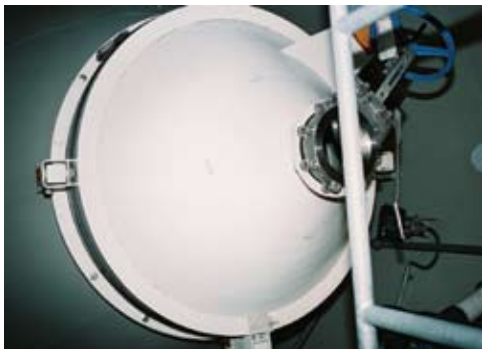

Columbian TecTank is the only tank manufacturer with a large assembly facility dedicated solely to the professional installation and hookup of components to your specification. The close proximity of our assembly facility to our welded tank manufacturing plant and our technicians who specialize in tank component installation provide:

- High quality component installation and fit-up by specialized technicians
- Time savings in delivery and erection
- Cost savings in field labor and transportation

Our installations include a wide variety of components:

- Electrical conduit
- Pumps and metering devices
- Bin activator and motor combinations
- Full slaker and slurry systems
- Level indicators
- Light fixtures
- Heaters
- Knife gates
- Vibratory units
- Volumetric feeders
- Piping and valves
- Exhaust fans
- Bin vent filters
- Switches and controls
- Control panels
- Aeration systems
- Skirt insulation

Our commitment to your satisfaction is reflected in providing high-quality products that meet your requirements for performance and value.

Call 620-421-0200 today to learn how you can have the best value in component installed tanks.

COLUMBIAN
TecTank
Proven Performance in
Tank Storage Solutions

Unsurpassed Quality, Exceptional Performance

Columbian TecTank operates ISO 9001-certified facilities and employs only ASME-qualified welders. From engineering to in-shop fabrication to component installation, our focus is on providing products and workmanship that will lead to exceptional performance.

Our factory-applied coatings are far superior to field-welded tanks. We feature a high cross-linked epoxy with excellent resistance to corrosion. These coatings provide superior immersion qualities and dramatically reduce life cycle maintenance costs.

The Unrivalled Value of Experience

With more than 100 years of experience, Columbian TecTank has produced and installed more than 150,000 tanks around the world.

Columbian TecTank has expertise in constructing component installed tank systems for a vast array of water treatment applications. Common uses include storing lime and magnesium oxide for treating wastewater and process water.

Applications include:

- Treating water used in the oil-sand extraction process
- Storing powder-activated carbon used to remove mercury from water
- Desulphurizing flue gases in fossil-fuel-burning facilities, such as coal-fired power plants

Our engineers serve on multiple national committees, setting standards and advising other groups on specifications that have proved superior across a wide variety of uses. This engineering expertise and professional involvement translates into tank systems that meet or exceed industry standards, regardless of the application.

With expert installation from Columbian TecTank, you can rest assured your tank will stand up to years of maintenance-free service.

For the best component in tank solution, call 620-421-0200 today!
