& Grain – FOR OVER 50 YEARS

Columbian TecTank invented grain storage silos that utilize “smoothwall” steel sidewall panels. Unlike light gauge corrugated panels, smoothwall construction is heavier, minimizes product hang-up and is designed for process requirements. When you are evaluating the need for quality storage that will stand the test of time, CTT should be at the top of the list.

CTT specializes and has tailored their Ag tank line to three specific markets in grain storage . . .

Large XL flat bottom storage silos – available up to 200’ diameter (1.7 million bu.)

- ❖ Utilize field-welded or bolted-deck assemblies
- ❖ Factory baked-on coatings

Feed mill tanks - designed for meal storage

- ❖ 15-29’ diameter
- ❖ Utilize bottom screw unloaders
- ❖ Chisel-bottom hoppers designed for mass flow product discharge

Open skirt silos – Welded hopper bottom

- ❖ 10’-14’ diameter x 24’-60’ height
- ❖ Minimum 10-12 ga. design
- ❖ 45, 60, 70 degree hoppers
- ❖ Factory baked-on coatings

Evaluate your storage requirements and then evaluate what Columbian TecTank offers. We are known for **storage solutions that are practical**. Competitively priced, lowest maintenance, expandable designs, quick delivery and installation has made CTT the largest silo supplier in North America. Check us out . . .
