

Columbian TecTank Solutions For your Power Generating Facility

**Proven quality tank solutions –
ready when you need them.**

Unrivalled experience: With over 100 years of history, Columbian TecTank is the firmly established leader in bolted and factory-welded tanks for power generating applications. Our integrated project team works with you to ensure your tank is designed to yield the best lifelong value for your application.

- Proven reputation as the industry leader based on our products' performance over time
- 150,000 tanks delivered in over 125 countries around the world for a wide variety of applications and environments
- Experienced in-house engineers
- Solutions designed to meet or exceed industry standards and requirements including AWWA D103, FM and NFPA-22
- Liquid storage applications for de-mineralized / de-ionized water, boiler feed water, process water, wastewater, fire protection, fly ash and lime slurries, fuels and lubricants
- A full range of industrial process dry bulk storage tanks for fly ash, lime and coal

Highest quality: No other tank manufacturer carries as many third party endorsements or quality certifications as Columbian TecTank.

- The only API 12B license holder in North America
- The Columbian TecTank chime lap design is the only joint design recognized by the API 12B Standard
- Our proprietary coatings set the industry standard, offering the strongest corrosion resistance in the market

Call (913) 621-3700 today to learn how you
can have the best value in power generating applications.

COLUMBIAN
TecTank
Proven Performance in
Tank Storage Solutions

- Coatings are factory applied and thermally cured in controlled environments, eliminating the risks, costs and time delays associated with field-applied coatings
- The high quality and endurance of our Trico-Bond EP™ coatings extend tank life and reduce maintenance costs
- Our tanks are made to “leak free” specifications
- All products are manufactured in ISO 9001:9002 certified facilities

Best value: Budgets matter! Columbian TecTank’s durable construction, superior coating and fast in-field erection means our tanks offer lower initial and overall life cycle costs when compared to alternatives.

- Dedicated engineering, specialized manufacturing plants, factory applied coatings and modular construction work together to permit the most competitive “order-to-completion” cycle
- Tanks can be put into service in inclement weather due to the factory applied coating, thus extending the construction season and reducing costly project delays
- Modular design enables field modifications, future expansion and even site re-location. And while the tanks are more flexible than other choices, you sacrifice nothing in life long durability

When you need the highest quality tank solution at the best value, call the most experienced, professional and reliable manufacturer for your project—Columbian TecTank.
